## Mathematics Benchmarks for Grade 4

Strand: Operations and Algebraic Thinking (OA)
Use the four operations with whole numbers to solve problems.
Interpret a multiplication equation as a comparison
Represent verbal statements of multiplicative comparisons as multiplication equations
Multiply or divide to solve word problems involving multiplicative comparison
Distinguish multiplicative comparison from additive comparison
Solve multistep word problems involving whole numbers and having whole-number answers
Use equations with a letter standing for the unknown quantity to represent multistep word problems involving whole numbers and having whole-number answers
Use mental computation and estimation strategies to assess the reasonableness of answers to multistep word problems involving whole numbers and having whole number answers
Gain familiarity with factors and multiples.
Find all factor pairs for a whole number in the range 1–100
Relate a whole number to a multiple of each of its factors
Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number
Determine whether a given whole number in the range 1–100 is prime or composite
Generate and analyze patterns.
Generate a number or shape pattern that follows a given rule
Identify features of a number or shape pattern that were not explicit in the rule itself
Explain why a number pattern alternates between odd and even numbers
Strand: Number and Operations in Base Ten (NBT)
Generalize place value understanding for multi-digit whole numbers.
Define the concept of place value by representing that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right
Identify multi-digit whole numbers using base-ten numerals, number names and expanded form

and expanded form
Record the results of comparisons between multi-digit numbers using the symbols >, =, and <
Round multi-digit whole numbers to any place
Use place value understanding and properties of operations to perform
multi-digit arithmetic.
Add and subtract multi-digit whole numbers fluently using the standard algorithm
Use strategies based on place value and the properties of operations to
multiply a whole number of up to four digits by a one-digit whole number
Use strategies based on place value and the properties of operations to multiply two two-digit numbers
Explain the calculation of multiplying a whole number of up to four digits by a one-digit whole number
Explain the calculation of multiplying two two-digit numbers
Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors
Explain the calculation of whole-number quotients and remainders with
up to four-digit dividends and one-digit divisors
up to four-digit dividends and one-digit divisors Strand: Number and Operations - Fractions (NF)
up to four-digit dividends and one-digit divisors Strand: Number and Operations - Fractions (NF) Extend understanding of fraction equivalence and ordering.
up to four-digit dividends and one-digit divisors Strand: Number and Operations - Fractions (NF) Extend understanding of fraction equivalence and ordering. Describe the relationship between a fraction a/b and its equivalent fraction (n × a)/(n × b) by using visual fraction models
up to four-digit dividends and one-digit divisors Strand: Number and Operations - Fractions (NF) Extend understanding of fraction equivalence and ordering. Describe the relationship between a fraction a/b and its equivalent fraction (n × a)/(n × b) by using visual fraction models Generate equivalent fractions using the principle that a fraction a/b is
up to four-digit dividends and one-digit divisorsStrand: Number and Operations - Fractions (NF)Extend understanding of fraction equivalence and ordering.Describe the relationship between a fraction a/b and its equivalent fraction $(n \times a)/(n \times b)$ by using visual fraction modelsGenerate equivalent fractions using the principle that a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$
up to four-digit dividends and one-digit divisorsStrand: Number and Operations - Fractions (NF)Extend understanding of fraction equivalence and ordering.Describe the relationship between a fraction a/b and its equivalent fraction $(n \times a)/(n \times b)$ by using visual fraction modelsGenerate equivalent fractions using the principle that a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ Compare two fractions with different numerators and different
up to four-digit dividends and one-digit divisors Strand: Number and Operations - Fractions (NF) Extend understanding of fraction equivalence and ordering. Describe the relationship between a fraction a/b and its equivalent fraction (n × a)/(n × b) by using visual fraction models Generate equivalent fractions using the principle that a fraction a/b is equivalent to a fraction (n × a)/(n × b) Compare two fractions with different numerators and different denominators

Join parts referring to the same whole when adding fractions

## Mathematics Benchmarks for Grade 4

Separate parts referring to the same whole when subtracting fractions
Write an equation recording the decomposition of a fraction into a sum of fractions with the same denominator
Justify the decomposition of a fraction into a sum of fractions with the
same denominator
Add and subtract mixed numbers with like denominators
Solve word problems involving addition and subtraction of fractions
having like denominators referring to the same whole
Demonstrate that a fraction a/b is a multiple of 1/b
Multiply a fraction by a whole number to show that a multiple of a/b is a
multiple of 1/b
Solve word problems involving multiplication of a fraction by a whole
number
Understand decimal notation for fractions, and compare decimal
Fractions.
denominator 100
Add two fractions with respective denominators 10 and 100 by using the
technique of expressing a fraction with denominator 10 as an equivalent fraction with denominator 10
Translate fractions with denominators 10 or 100 into decimals
Compare two decimals to the hundredth place
Show that comparisons between two decimals to the hundredth are valid only when the two decimals refer to the same whole
Record the results of comparisons of two decimals to hundredths with
the symbols >, =, or <, and justify the conclusions
Strand: Measurement and Data (MD)
Solve problems involving measurement and conversion of
measurements from a larger unit to a smaller unit.
Name relative sizes of measurement units within one system of
measurement
Express measurements in a larger unit in terms of a smaller unit within a
single system of measurement
Record measurement equivalents in a two column table within a single system of measurement
Use the four operations to solve word problems involving simple fractions

Use the four operations to solve word problems involving decimals
Use the four operations to solve word problems that require expressing measurements given in a larger unit in terms of a smaller unit
Represent measurement quantities using diagrams to solve word problems
Apply the area formula for rectangles in real world and mathematical problems
Apply the perimeter formula for rectangles in real world and mathematical problems
Represent and interpret data.
Make a line plot to display a data set of measurements in fractions of a unit
Solve problems involving addition and subtraction of fractions by using information presented in line plots
Geometric measurement: understand concepts of angle and measure angles.
Show that an angle is measured with reference to a circle with its center at the common endpoint of the rays
Show that an angle that turns through n one-degree angles has an angle measurement of n degrees
Measure angles in whole-number degrees using a protractor
Sketch angles of specified measure in whole-number degrees using a protractor
Show that angle measure is additive
Use a diagram to find unknown angles in solving real world addition and subtraction problems
Strand: Geometry (G)
Draw and identify lines and angles, and classify shapes by properties of their lines and angles.
Draw points, lines, line segments, rays, angles, perpendicular lines, and parallel lines
Identify points, lines, line segments, rays, angles, perpendicular, and parallel lines in two-dimensional figures
Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines
Classify two-dimensional figures based on the presence or absence of angles of a specified size

## Mathematics Benchmarks for Grade 4

Classify right triangles as a category of angles
Identify right triangles
Express a line of symmetry for a two-dimensional figure as a line across the figure
Identify line-symmetric figures for a two-dimensional figure
Draw lines of symmetry for a two-dimensional figure
Mathematical Practice
Strand: Solve Problems (MP1)
1. Make sense of problems and persevere in solving them.
Make sense of problems and persevere in solving them
Strand: Reason (MP2)
2. Reason abstractly and quantitatively.
Reason abstractly and quantitatively
Strand: Construct Arguments (MP3)
3. Construct viable arguments and critique the reasoning of others.
Construct viable arguments and critique the reasoning of others
Strand: Model (MP4)
4. Model with mathematics.
Model with mathematics
Strand: Use Tools (MP5)
5. Use appropriate tools strategically.
Use appropriate tools strategically
Strand: Attend to Precision (MP6)
6. Attend to precision.
Attend to precision
Strand: Use Structure (MP7)
7. Look for and make use of structure.
Look for and make use of structure
Strand: Express Regularity (MP8)
8. Look for and express regularity in repeated reasoning.
Look for and express regularity in repeated reasoning
